

COUNTY OF LAMBTON

2026-2030 Roads Construction Program

Prepared by: Public Works Department
County of Lambton

Date: April 2026

Introduction

The County of Lambton Public Works Department is responsible for the operation and upgrade of approximately 650 kilometres of roads and over 186 bridges and major culverts. The County Road network connects Lambton's communities and is critical to the County's economy and quality of life. The objective of the Public Works Department is to ensure the infrastructure that makes up the County Road network is maintained and constructed to applicable standards, providing the safe and efficient movement of people and goods throughout the County.

Potential County Road projects are reviewed annually during budget planning. Candidate road and bridge projects are prioritized based on a number of variables to determine appropriate treatments and schedules that balance construction costs with infrastructure lifecycle. In addition to design standards and guidelines, as part of the Comprehensive Asset Management Plan, the County has established level of service targets for the road network. To help meet these goals, the County uses a number of rehabilitation techniques to help extend the life of the assets. Environmentally responsible options are employed to best utilize existing resources.

The 2026-2030 Roads Construction Program is a consolidated listing of the County's prioritized road and bridge project list for the next 5-year period. It is intended to be a living document, updated annually, that can be shared to communicate the County's anticipated projects with partner municipalities, stakeholder agencies, and members of the public.

2026 PLANNED CONSTRUCTION

Roadway	29.2 km
Structure Rehabilitations	3
Structure Replacement	2
Partially-Paved Shoulders	30.6 km

The projects in this Program are selected based on the best and available information at the time of assessment. Many of the variables considered will continue to change as projects develop. Ultimately, future construction will be subject to available funding, design, environmental and agency approvals, property acquisition, and conflicts or partnerships with other municipal projects.
